

**FEEDALL SO #17676**

## **FEEDALL** Model 1500 Feed System

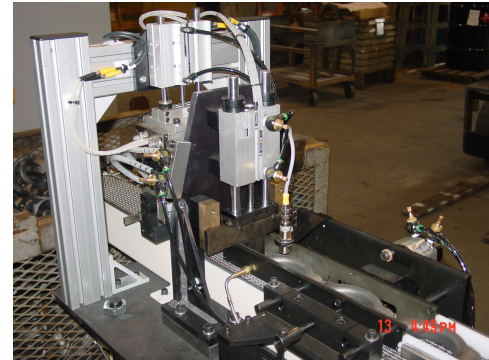

*The model 1500 Feed system is EXTREMELY flexible and capable of feeding all kinds of different parts. Unlike traditional PARTS FEEDERS this feed system can not only handle tubular/solid slugs and pucks in the same feed system, it can handle them GENTLY with no part fallback! If you are machining / forging / grinding /induction hardening or whatever FEEDALL has your parts feeding problem handled! We have been providing parts feeding solutions that not only meet but exceed customer's expectations since 1946! In this application we were feeding Bearing caps to a machining operation. We were orienting these caps with the "nubs" up all one way, one at a time for robot loading! Contact one of our Sales Representatives at 440-942-8100 or visit our website at [www.feedall.com](http://www.feedall.com). We look forward to the opportunity to show you how we can not only solve your parts feeding problems but more importantly, increase your bottom line!*

## Bearing caps

Escapement 180 degree rotary device and part orientation sensor

## Storage hopper
